PROFILE SUMMARY

Motivated and passionate IT student with a strong foundation in Java full stack development. Eager to apply my technical skills in Spring Boot, REST APIs, and React to real-world projects. Committed to building innovative, scalable solutions and continuously growing in a dynamic, challenging environment.

INTERNSHIP

ALTRUISTY - FULL STACK WEB DEVELOPMENT | NOV 2024 - JAN 2025

- Contributed to frontend by creating 10+ pages for the Altruisty platform during a remote internship.
- Collaborated with a 4-member full stack team to enhance UI components and improve overall usability. Gained practical experience in full stack development.

TECHNICAL SKILLS

- **Programming** - Python, Java
- **Web Development** - HTML, CSS, JS
- **Database** - SQL, MongoDB
- **Tools** - Figma, Git, Postman, EXCEL
- **Framework** - Spring Boot

SOFT SKILLS

- Team collaboration
- Time management

SKILLS SUMMARY

- In Java, skilled in core concepts such as conditional statements, looping, exception handling, collections, and object-oriented programming (OOP) principles. Skilled in Python with knowledge of Fundamentals and building GUI apps using PyQt5. Familiar with connecting Python to SQL databases.
- In SQL working with DDL, DML, DQL, and TCL queries. In MongoDB , skilled in creating and managing databases and collections, and performing CRUD operations.
- Proficient in Front-end development using HTML, CSS, and JavaScript for creating responsive web pages. Comfortable using Figma to design clean and user-friendly UI layouts.
- In Spring Boot, Familiar with basic annotations, Spring JDBC connectivity, and performing CRUD operations. Basic Understanding of creating RESTful APIs and testing endpoints using Postman.

PROJECT

TITLE : CRM - CUSTOMER RELATIONSHIP MANAGEMENT | JUN 2025 - JUL 2025

- Built a desktop-based application using Python and core programming concepts. Designed a responsive GUI using PyQt5 and connected it to a SQL database for storing and managing customer records.

TITLE : FREELANCER TRUST EVALUATION SYSTEM | JAN 2026 - MAR 2026

- Developed the Frontend of a Windows Desktop Freelancer resume evaluation application using React. Built a Backend APIs using in Python (Fast API) to extract resume text, process profiles, and deliver scoring results. Implemented AI scoring using Python with BERT, LSTM and HEURISTIC ALGORITHM models to generate trust score, risk levels, and flags.

TITLE : BANKING SYSTEM | APR 2026 - MAY 2026

- Developed the console - based Banking System using Java, Spring Boot, Spring JDBC with a menu driven interface for real time user input. Implemented core Banking operations such as Account creation, Deposit Amount, Withdrawal, Transaction history using JDBC with MYSQL.

EDUCATION

AGNI COLLEGE OF TECHNOLOGY CGPA - 8.5	2022-2026
GOVERNMENT HR SECONDARY SCHOOL HSC - 82%	2021-2022
GOVERNMENT HIGH SCHOOL SSLC - 76%	2019-2020

CERTIFICATION

- NPTEL | The Joy of Computing using Python.
- NPTEL | Data structures and Algorithm in Java.
- INFOSYS | SPRINGBOARD - Full Stack Web Development.
